STANDARD OPERATING PROCEDURE Radio Problem Reporting Procedure

DATE: July 31, 2001

PURPOSE: system wide notification procedure for system related radio problems.

SCOPE: Dispatch centers

GENERAL DESCRIPTION:

In the event that a PPRCN radio system malfunction occurs a system wide process needs to be employed to cause the proper notifications to be made to begin the tracking and repair process. This procedure will be observed during the warranty period of one year ending on September 1, 2002.

For PPRCN system related malfunctions, the following procedure will be observed by all dispatch centers:
